DETAILED ACTION

Response to Amendment

Rejections Repeated

1. The 35 U.S.C. 103(a) rejections of claims 1-24 are repeated for the reasons previously cited in the Office Action dated 05/04/04.

Response to Arguments

2. Applicant's arguments filed 08/02/04 have been fully considered but they are not persuasive.
3. Applicant argues that there is no motivation to incorporate the crosslinking agent and catalyst into a polyvinyl alcohol-based adhesive layer, saying that although Buzzell discloses that adding the crosslinking agent to form the polyvinyl alcohol polarizer films can help to maintain the dimensional stability of the polymer against ambient humidity, Buzzell is completely silent regarding whether adding a crosslinking agent and catalyst into the adhesive layer would improve the dimensional stability of the polarizing plate laminate.

Applicant is respectfully apprised that while Buzzell does not specify that adding a crosslinking agent and catalyst into the adhesive layer would improve the dimensional stability of the polarizing plate laminate, Buzzell teaches that the crosslinking agent helps maintain the dimensional stability of the polyvinyl alcohol polymer against ambient humidity (column 5, lines 25-30). Buzzell specifies the polymer itself, meaning that any component made from the polymer with crosslinking agent and catalyst added, including the adhesive layer composed of the polymer (column 6, lines 1-10), and hence the polarizing plate laminate comprising the

Art Unit: 1772

polarizer film and the adhesive layer composed of the polymer, would have improved dimensional stability against ambient humidity.

4. Applicant argues that there is no indication that any of the crosslinking agent and catalyst migrates inherently from the polarizer film of Buzzell into the adhesive.

Applicant is respectfully reminded that the issue of the potential migration of crosslinking agent and catalyst is absent from the rejections in the Office action dated 05/04/04.

Conclusion

5. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
